Subject: Microsoft Antitrust Settlement

In my opinion, had it not been for Mr. Bill Gates and his Microsoft Corporation, I would not be capable of even writing you this e-mail today! His vision took computers to a level that regular people could use the tools of our future. We are now there and moving even further because of his wisdom and vision. Let the others add to and enhance his vision but I feel it very wrong and almost anti-American to punish a person that took his dream and made it a reality. Isn't that what we all want to do? Do what we do better than anybody else and control our own future. I'll stop before you think I am his mother, but I feel we should be thanking the man and the company for what they have given us. Certainly we should not punish him for doing what all business what; being successful. Thank you,
